

LaBor Dental seeks to combine the traditional dental technology with up-to-date **digital technology**: our advanced working protocols, in fact, allow us to guarantee our clients a high and repeatable quality standard in a short period of time.

Our Dental Laboratory can meet any working necessity both for fixed and combined prosthetics, using the most advanced digital technology in terms of production and design.

We use some of the best machinery of the field, which assure that our laboratory is fully **Digital**.

Moreover, with the employment of the new digital products, we can follow our clients working remotely, while keeping a high level of **quality** and **precision**.

Thanks to the new protocols **CAD CAM** it is possible to use and produce prosthodontic appliances made of high-performing and certified materials:

Zirconia
Disilicato
Compositi
Peek - Pekkton
Fibra
PMMA Multi-strato
Bio HPP (Bredent)
Polimeri HIPC (Bredent)
Polimeri Modificati

Resine Bio-compatibili (BIOsitemTRE)

Cr Co Laser Melting

Cr Co e titanio fresato

Resine stampa 3D

specialises in:
